### Notes:

1. A skilled facilitator should lead the whole process over the 4 days with expert presenters from the region providing the module presentations.
2. The presenters should attend and participate in each day of the training, not just the day they are giving their presentation, so they can serve as resources for the participants.
3. All module presentations should be interactive and invite participants to share experiences throughout.
4. The group exercises are designed to provide ample time for participants to learn from each other.
